EDUCATION

GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY   New Delhi, India
Computer Science and Engineering B.Tech   2021 - 2024
CGPA: 8.7

EXPERIENCE

Girl Script Summer of Code | Open Source Contributor   Remote | May 2023 - August 2023
- Actively Contributed to diverse web development projects using React, Firebase, and Bootstrap.
- Collaborated with a cross-functional team to deliver dynamic and responsive user interfaces, showcasing proficiency in React.js.
- Built dynamic and responsive user interfaces with React.
- Demonstrated strong problem-solving skills in a fast-paced, collaborative environment.

SKILLS

Programming Languages:	C++ , Javascript
Libraries/Frameworks:	React js, Next js, Node js, Express js, Firebase, Tailwind CSS, Bootstrap, Chakra UI,
Tools / Platforms:	Postman, vs code, Canva
Databases:	Mongo DB, SQL

PROJECTS / OPEN-SOURCE

Travellers | Link   *React js, Firebse, Firestore,CSS*
- Created a Travelers Web App utilizing React and CSS, delivering an intuitive user interface tailored for booking tour packages.
- Executed user authentication and enhanced security through private routes, leveraging Firebase's Firestore as the backend.
- Integrated Firestore as the secure database for the storage and retrieval of user data and tour package information.

ElectroMart | Link   *Next js, Mongo db, Tailwind css*
- Orchestrated end-to-end architecture for an e-commerce app, integrating JWT for user authentication and Razorpay for payments.
- Leveraged JWT and Context API for robust user authentication and streamlined state management.
- Crafted a responsive UI with Next UI and Tailwind CSS for optimal cross-device user experiences.
- Implemented robust security protocols, including password hashing and salting, for user data protection.
- Enforced robust security protocols for user authentication, including password hashing and salting, to fortify user data protection.
- Ensured secure user authentication practices throughout the development process

WearAble | Link   *React js, Node js, Express js, Mongo DB*
- Led the architecture, design, and implementation of a comprehensive MERN e-commerce application.
- Integrated user authentication using JWT and seamlessly incorporated Braintree for payment processing.
- Engineered RESTful API endpoints using Express.js to efficiently manage data.
- Crafted a responsive and intuitive React front-end, leveraging state management through the React Context API.
- Implemented robust security measures for user authentication, including password hashing and salting to safeguard user data.

HONORS & AWARDS

1500+ rating on Leetcode

600+ question solved in Leetcode

5 star on HackerRank in Problem Solving
